

Key benefits of SCOPD: real-time protection and risk mitigation

System Block & Alerts

Immediate blocking of compromised systems and real-time alerts to security teams.

Data Loss Prevention & Classification

Prevent unauthorized sharing of sensitive information by classifying data based on its importance and ensuring proper protection.

Insider Threat Detection

Monitor user behavior to identify internal risks before they escalate.

Compliance

Ensure alignment with data protection regulations.

If you want to try, deploy a pilot or need additional information on the solution, please contact sales@adeon.international.

Maximize employee effectiveness: from engagement to burnout prevention

Innovative technologies to protect against data loss

StopPhoto technology

The technology instantly detects attempts to take a photo of screen by smartphone, allowing early detection of data loss.

Different watermark options

Ability to add visible or invisible watermarks to screenshots or print documents for tracking purposes.

If you want to try, deploy a pilot or need additional information on the solution, please contact sales@adeon.international.
