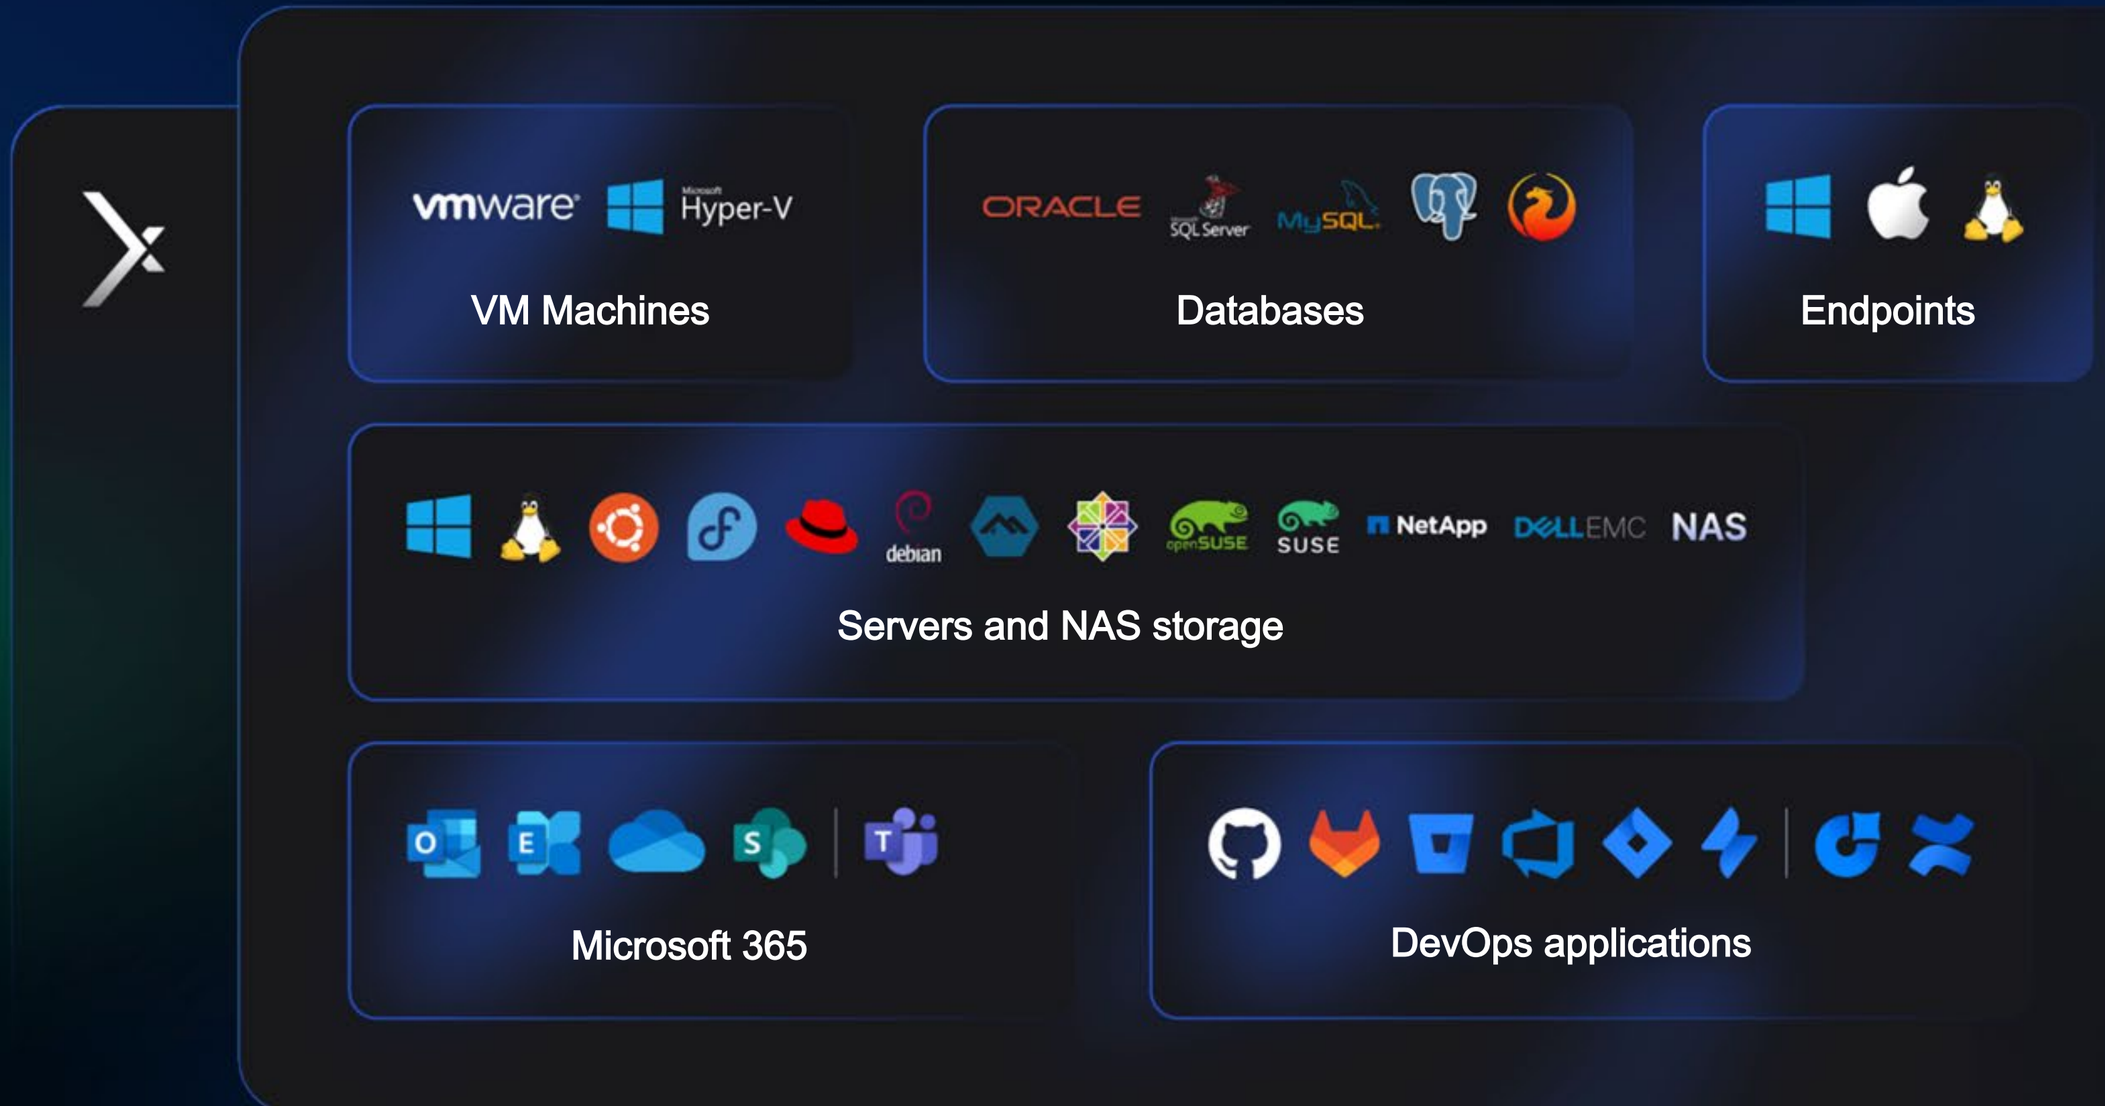
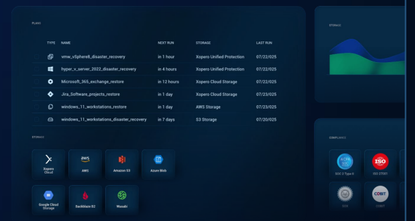
Comprehensive data protection



Multi-storage system

Xopero Software products family

Xopero ONE



Comprehensive Backup
and Recovery software

GitProtect.io

The most tech-savvy backup
and disaster recovery
for DevOps

All the best
in Xopero Software

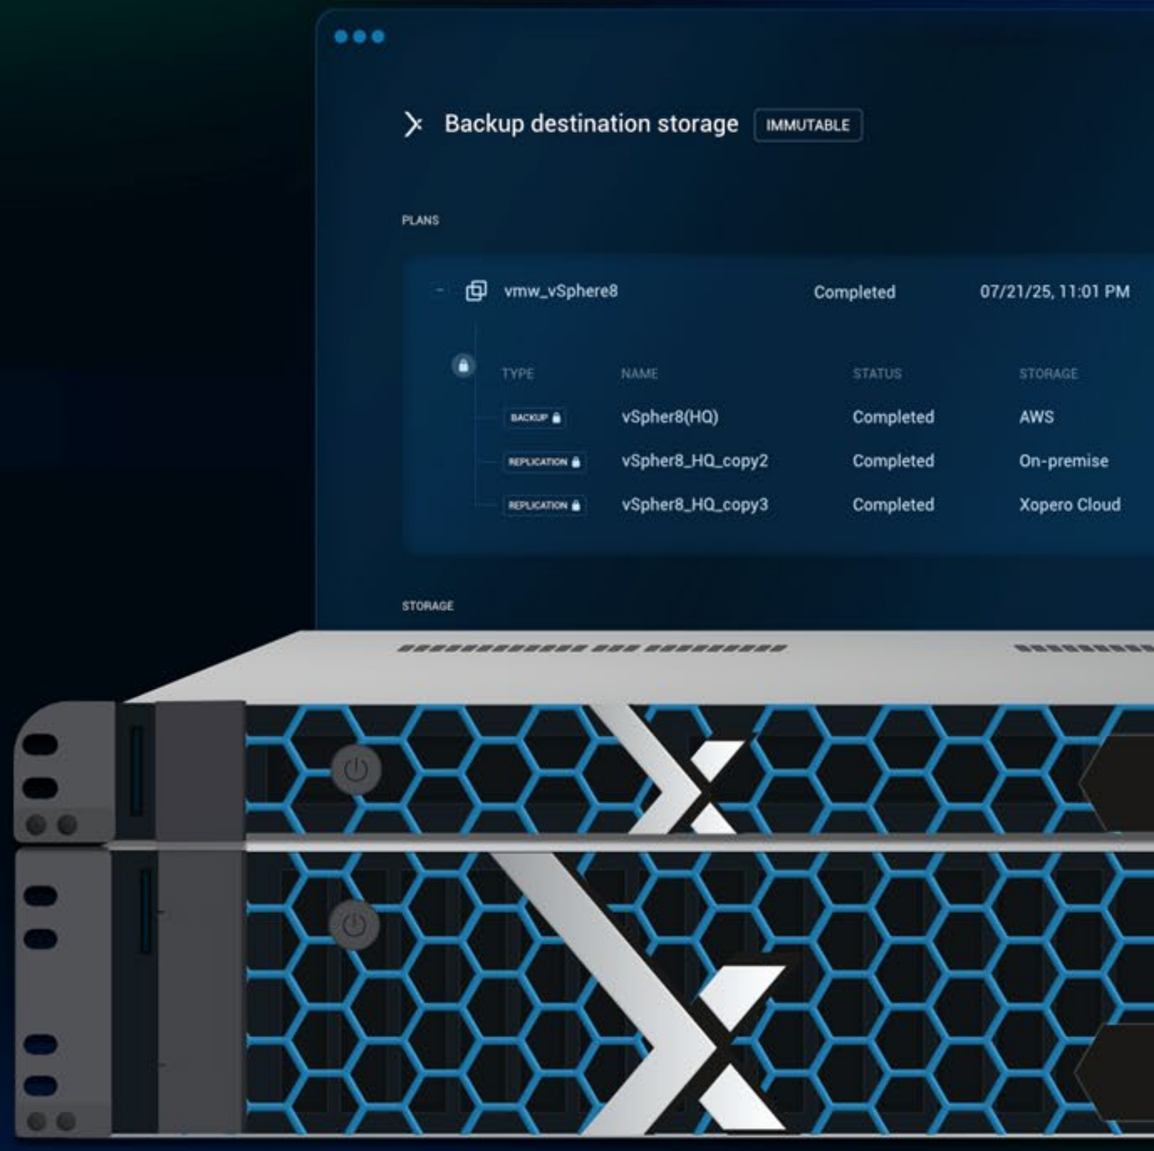
Advanced backup Xopero ONE

- Flexible scheduling based on Basic, GFS, or Forever Incremental schemes
- Global deduplication on source
- Data compression on source
- Advanced retention settings

All the best in Xopero Software

Recovery and replication

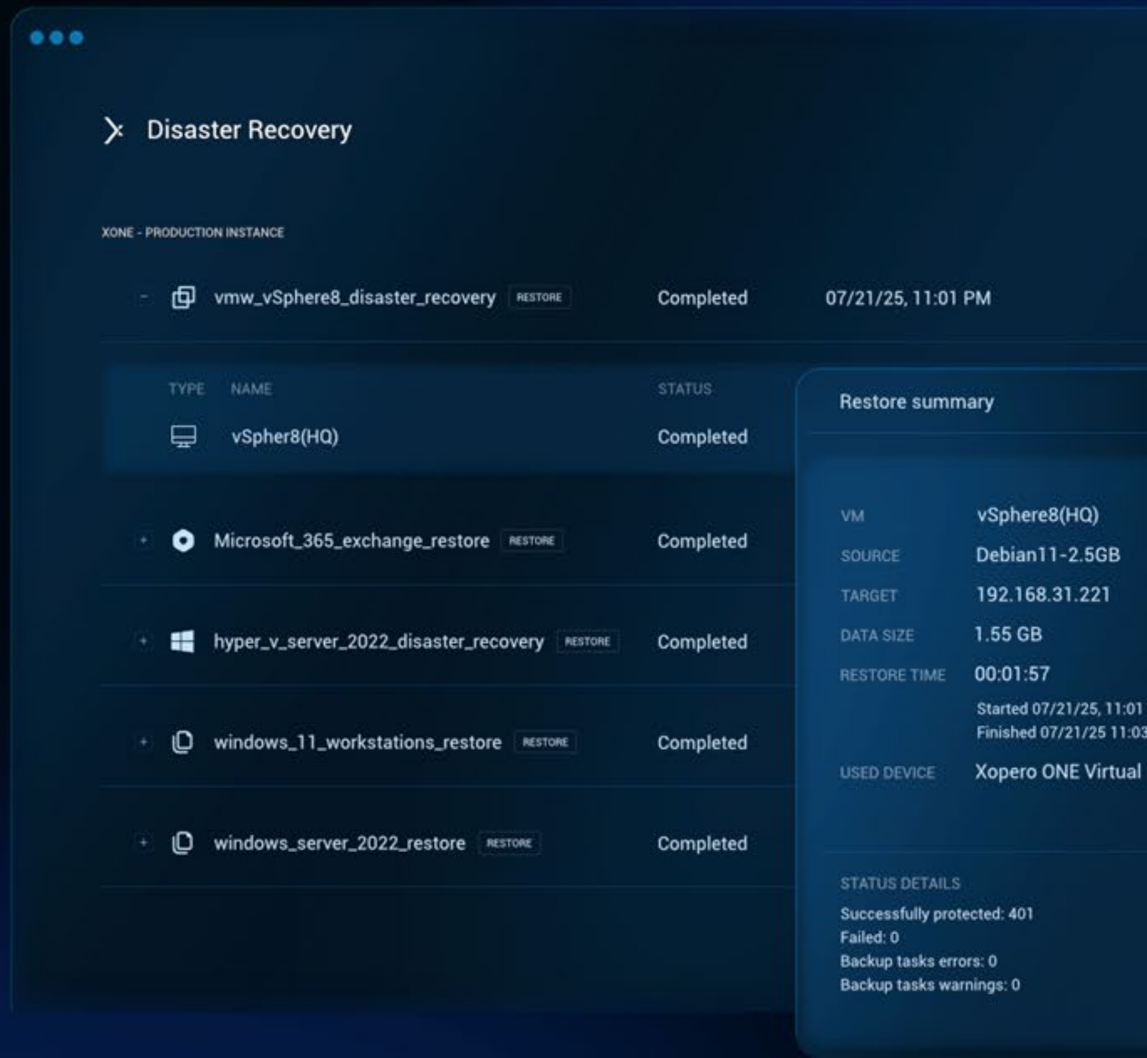
- Point-in-time recovery
- AES encryption in-flight and at rest with your own key
- Multi-storage system
- Replication between all types of storage



Disaster Recovery without compromise

Instant data recovery in any scenario

- Instant Disaster Recovery
- Cross-Platform recovery
- Granular Restore and much more



The highest security standards

One platform. Complete protection - All-in-ONE

No Single Point of Failure

You may lose access or panel configuration, but as long as you have the encryption key, you can always restore your data and settings.

Zero-Knowledge Encryption

The device has no information about the encryption key - it only receives it during the backup process.

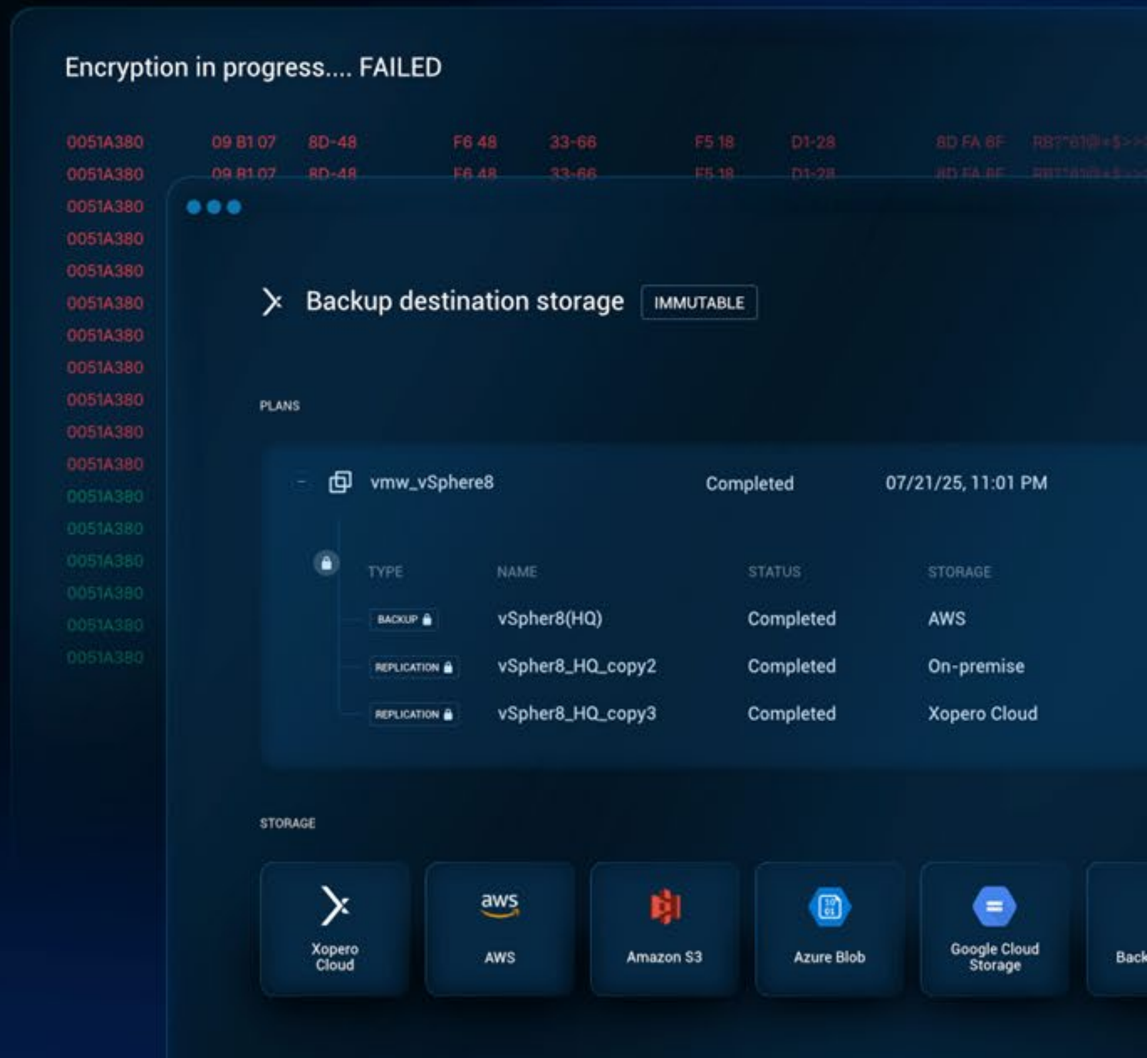
Secure Password Manager

Store and manage all your passwords (internal/external) in one secure place.
Don’t remember - choose from the list.

Ransomware protection

SphereCyberX and the Zero-Trust approach

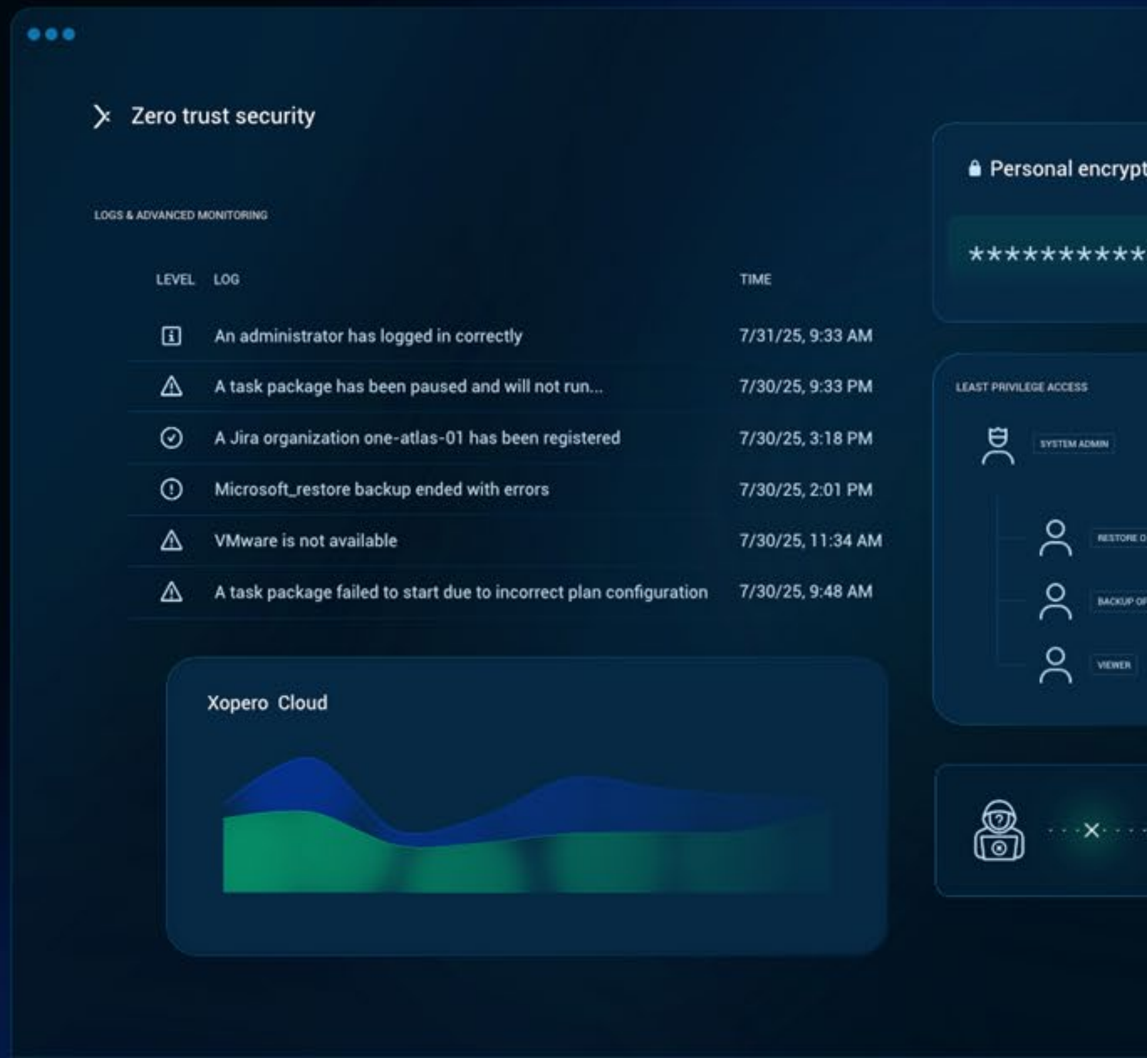
- Files in non-executable formats
- Immutable storage (WORM)
- Unlimited number of replication repositories
- S3-compatible object storage
- Access to the storage only during data transfer
- Instant restore DR
- Backup as a Service



Central management

Manage the security of your entire environment

- Single web-based console
- Unlimited number of administrator accounts with different permission levels
- Modern and super-user-friendly interface



Monitoring

Monitor all actions and respond instantly

- Dashboards based on advanced analytical data
- E-mail, Slack, and SLA reports
- Role and permission control
- Advanced audit logs and real-time activity tracking
- Webhooks for external monitoring systems
